## **Partnership to help Educate and Monitor the Health of our Local Seniors**

Kosciusko Home Care & Hospice partners with Kosciusko Community Senior Services (KCSS) to provide monthly blood pressure monitoring and health education. On March 17th, seniors attended the health education monitoring program. This program provides an opportunity for seniors with limited transportation and financial resources to learn to care for themselves. “Our mission is to improve the quality of life and health of our local seniors,” shared David Neff, KCSS Executive Director.
